CAREER OBJECTIVE

Language-agnostic Computer Science undergraduate with strong foundations in DSA and full-stack development, focused on building scalable systems and high-impact software products.

ACHIEVEMENTS

Won **5 national-level prizes** (1 aptitude, 1 algorithmic coding, 3 technical quizzes), competing among **500+ participants per event** [\[Link\]](#)

Achieved **Top 26% global rank (3364/13,000+)** in **IICPC CodeFest '26 Prelims**, a competitive programming competition, with **near-zero penalty time**. [\[Link\]](#)

SKILLS

Languages	Java, JavaScript, SQL, TypeScript
Frameworks & Libraries	React, Node.js, Next.js, Express.js, WebSockets
Database/Tools	MongoDB, Git, Postman, NeonDB
Relevant Coursework	Data Structures and Algorithms , Object Oriented Programming , DBMS
Coding Profiles	LeetCode , CodeForces , CodeChef

PROJECTS

Stock Trading Simulator

[Link to Demo](#)

—Python, Flask, Jinja, PostgreSQL, Bootstrap

- Built a **full-stack stock trading simulator** enabling real-time stock quotes, buy/sell execution, and portfolio tracking using Flask

Excalidraw Clone

[Link to Demo](#)

—Next.js, React, TypeScript, Tailwind CSS, RoughJS

- Designed and implemented a real-time collaborative drawing application using WebSockets, enabling multiple users to concurrently create, update, and delete canvas elements while maintaining a consistent shared state across clients
- Achieved low-latency collaboration with reliable state synchronization, supporting seamless multi-user interactions and demonstrating scalable real-time system design

EDUCATION

2023 - 2027	Bachelor's Degree at Nagesh Karajgi Orchid College of Engineering and Technology, Solapur [See Transcript]	(CGPA: 8.7/10.0)
2018 - 2020	Class 12 at Johnson Grammar School (ISC), Hyderabad	(CGPA: 8.5/10.0)

LEADERSHIP — STUDENT BODY PRESIDENT

SEPT 2025 - PRESENT

- Led my team in contributing to students' learning by organizing seminars, webinars and guest lectures, as well as a low-impact cultural event
